

HALL PYKE

THE SMART CHOICE

THE SMART CHOICE

The Smart Choice

Hall Pyke isn't a global company, we're not an international or world leader and you won't find us quoted on the New York Stock Exchange. But we do consider ourselves to be the **SMART** choice for filtration experts in Ireland today. So much so that it has become an integral part of our brand. What do we mean by the **SMART** choice?

Solutions - customised filtration solutions for your business

Money saving - unit price and total cost of ownership savings

Available product - stocks available when and where you require

Regional offices - Dublin, Cork and Limerick

Technical support - laboratory services and technical expertise

Choosing your filtration company is a very important decision for your business. We want to make sure you are making the right choice, the **SMART** choice.

Smart Solutions

The customer is at the core of everything we do at Hall Pyke. Our success is based on dedication to providing innovation and problem solving solutions for the challenges that our customers are facing. We are continuously working together, researching and analysing existing processes and then using this data for designing, developing and implementing filtration solutions across a range of industries from general manufacturing, food and beverage and pharmaceutical.

Filtration change is a costly and time consuming process. It requires specialist knowledge, experience, dedication and often long-term commitment to finding the truly optimal solution. Hall Pyke can provide this solution whatever the size or scale of the challenge.

*"When the storm comes, some build walls,
others build windmills".*

Smart Money

At Hall Pyke we know that the difference between *Price* and *Cost* can be huge.

Price – the amount of money for which something is sold

Cost – the amount of money needed to buy do or make something, to cause someone to lose or destroy something valuable

Hidden costs that are not evident at the start of a process can quickly add up. Then there is the additional costs that become necessary once the system is up and running. Not to mention the soft costs of personnel time and input, and while experience may be the best teacher it can be expensive.

Making a change to a validated process is both risky and time consuming. All change is risky, but it is often equally as risky to do nothing. Working with our experienced technicians we will help you to make an informed decision as to the true cost of change, the total cost of ownership and the real return on investment.

Smart Available Product

Hall Pyke is the largest stockist of filtration equipment in Ireland today. As agents for leading filtration manufacturers Hall Pyke can ensure that our customers have access to leading edge technology at all times for a vast array of applications.

Tying up funds in large quantities of stocks is both inefficient and expensive. Once you have decided on the best solution, access to those products in timeframes that are appropriate for your business is crucial. At Hall Pyke we work with our customers to ensure that products are available when necessary by managing physical stocks on site or on our own premises with customer specific stocking agreements.

Smart Regional Offices

Established in 1977, Hall Pyke is a privately owned and managed Irish company.

We know our market very well and can respond quickly and directly to our customers needs. Hall Pyke can provide comprehensive nationwide coverage. Our head office is located in Dublin with regional offices in Cork and Limerick.

We know that being part of the solution means being available when and where our customers require us. Hall Pyke maintains strong customer relationships through regular on-site visits to ensure customer satisfaction and quick resolution of any problems. Our local, professional Sales Technicians are sensitive to our customers needs and the markets in which they operate.

Smart Technical Support

Technical expertise, matched with a strong understanding of the customer specific process is necessary to deliver results in constantly changing, sometimes hostile and always challenging environments.

Hall Pyke provides excellent laboratory services using industry experts to ensure successful and prompt problem resolution as well as ongoing best practice solutions for our customers. Laboratory services include; integrity testing, particle size analysis, filter ability index testing and more.

We will help you to identify and solve your filtration problems. Writing the specification on a product is the start of the formal process and working with experienced, trained technical experts, Hall Pyke will help you to manage this process every step of the way.
