

## **Case History no. 19 – Mains Water Supply to Pharmaceutical Plant**

Fluid	: Incoming mains water
Max Flow	: 40m <sup>3</sup> / hr ( 147 GPM )
Clean Pressure Drop	: 3 – 5 psi
Retention Rating	: 60 micron

### **Problem:-**

A client in the pharmaceutical industry wanted to fit a filter to their incoming mains water and filter it to 60 microns.

As they had previously purchased both DCF's and backwashing units they wanted to look at an automatic backwashing unit.

### **Solution: -**

We supplied a model F203IB 3 station internal backwashing filter complete with backwashing diffusers and polypropylene filter sleeves.
